DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Deiss 2,732,941 in view of Frost 2,537,523

Deiss discloses a reciprocating, shaking cleaning shoe (19) including a panel (41) having a mounting assembly defining an acute downstream angle.

However, Deiss fails to disclose wherein the panel has an outer edge provided with an attached weight wherein the panel is flexible and resiliently flaps back and forth due to movement of the shoe.

Frost discloses a spreader comprising:

A panel (32) having an inner edge provided with a mounting assembly (32) and an outer edge provided with an attached weight (33), wherein the panel (32) is flexible and resiliently flaps back and forth.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the flexible panels of Frost on the cleaning shoe of Deiss in order to provide a sweeping action.

Response to Arguments

3. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 5 and 11-21 are allowed.
